

Plumbing Doctor's House Call

July 2007

Vol. 7 Issue 3

To the Customers and Friends of Plumbing M.D. Inc.®

The Doctor Responds to HVAC

As Plumbing M.D. continues its growth, our customer base has increased exponentially. In order to better serve the customers we already have and continue growth within our current markets, Plumbing M.D. will begin offering light HVAC work. In July 2007, founder and CEO, Michael Farias, earned his HVAC Class C-20 Contractors License, which allows Plumbing M.D. to begin offering such services. The addition of HVAC work seems a natural progression for our company because we already have strong recognition and good will built up throughout our market. Customers who trust us with their plumbing work will now be able to turn to us for their HVAC needs as well.

Though not yet offered, the additional services will emphasize the same great workmanship, effective systems and *the feel good plumbing experience!* that have made Plumbing M.D. a successful plumbing company.

Plumbing Doctor in the Top 50

Plumbing M.D. has had another year of outstanding growth. As many of you know, we were recognized by the *Sacramento Business Journal* as one of the fastest growing companies in the region in 2005 and again in 2006. On the strength of this growth, we expanded the company owned store into the Solano Market in 2005. After two successful years in the market, we were recognized by the *East Bay Business Times* as the 15th Fastest Growing Company in the East Bay on their list of the 50 Fastest Growing Companies.

The success we have experienced in this new market emphasizes the strength of the Plumbing M.D. brand and systems and highlights its ability to move into any market and immediately begin acquiring market share.

With all of the growth and success, we would like to thank our customers who continue to make it all possible. Thank you for another great year.

Franchising

Plumbing M.D. continues to seek qualified candidates to grow with us through franchising. Recently we have received inquiries from as far away as Texas and Washington, but we continue to pursue our strategy of local, regional growth.
